Allowable Subject Matter

Claims 1,3-10 and 12-19 are allowed.

The following is an examiner's statement of reasons for allowance:

The presently claimed invention differentiates over the prior art for the combination of multiple reasons. Presently the current invention relates to making a reservation for internet service and the redirection of the user if a reservation is not available. The present invention differs in that if an applicant cannot make a reservation they are redirected using a "edge router" which the applicant on the bottom of page 10 and continuing on the top of a page 11 of his remarks he clarifies how the edge router is different than what is presently found in the prior art of record. Additionally the present invention routes the users within the network as opposed to the prior art where the users connection is routed as opposed to the current invention, which routes the communication. Additionally the present invention submits command to the edge router to prevent the user going over the reservation time, which the applicant discusses in page 12 of his remarks. Therefore the combination of the discussed features and other limitations in the claim, the presently claimed invention overcomes the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
